

NEOSHO

Located on the broad floodplain below the junction of Flat Rock Creek and the Neosho River, the Neosho Wildlife Area is a man-made marsh developed and operated by

the Kansas Department of Wildlife, Parks and Tourism (KDWP).

The 3,246-acre wildlife area in Neosho County is managed to provide public hunting opportuni-

HISTORY

Construction of marshes began in the fall of 1960, and by early 1961 three pools were completed. Waterfowl hunting was first permitted in 1962. Funding for the original construction came, in part, from the Wildlife and Sport Fish Restoration (WSFR) program, which is derived from excise taxes on outdoor equipment and ammunition. WSFR funds are distributed to states at a cost-share rate of three to one. Lands used for production of agricultural crops as part of the management program remain on county tax rolls.

In the fall of 1988, 270 acres were added to the area

HUNTING

During spring and fall migration, duck numbers can sometimes reach 100,000 birds. More than 60,000 ducks, primarily mallards, normally spend the entire winter on the area.

Just prior to hunting seasons, hunting areas (Pool 1, 2A, 2B, 4A, 4B, 5, 6, 7, 8, and the South Unit) are flooded with approximately 2 feet of water. Pool 3, located in the refuge area, is managed to provide food, cover, and resting areas for migratory birds. All other pools are managed through a varying drawdown process to provide food for migrating waterfowl. Portions of all pools are managed in a moist-soil environment through an annual water-level manipulation plan. Four green tree marshes, ranging in size from 5 to 15 acres, offer a different type of hunting opportunity. Approximately 250 acres of corn, milo, and millet are planted in the pools by area KDWPT Public Lands staff.

In the waterfowl hunting areas, portable blinds may be used or temporary blinds may be constructed of native vegetation. These blinds must be removed within 10 days of the close of waterfowl season. No holes or

ties, while also furnishing migrating waterfowl a place to rest and feed. The area is divided into 19 man-made pools, which cover 1,748 acres with water when full.

FISHING

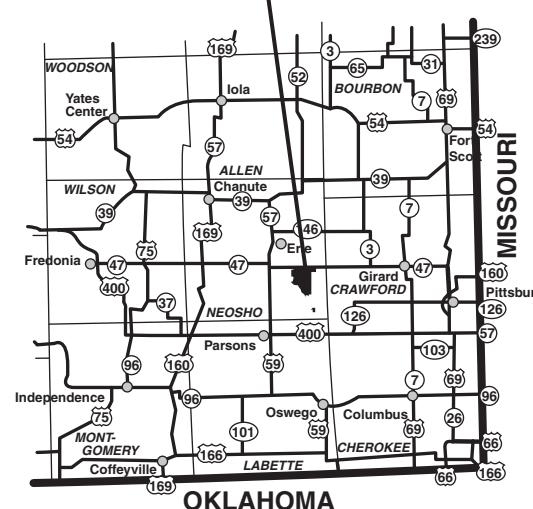

Fishing on the area is normally allowed from April 1 to August 31 and anglers are encouraged to try their luck. Fishing for flathead and channel catfish on the Neosho River, which forms the west boundary of the area, can be seasonally good to excellent. Bowfishing for carp on the mudflats in spring and summer can also be excellent.

THINGS TO REMEMBER

- Vehicles are permitted on maintained roads only.
 - Primitive camping is allowed in designated areas only, but please take your trash with you.
 - Consult area information signs for additional rules and regulations on the area.
 - **Non-toxic shot for all hunting.**
 - Daily iSportsman permits are free and required daily of ALL HUNTERS. All Hunters are required to Check-in prior to hunting and Check-out when finished hunting at the end of the day.
