

ECONOMIC IMPACT STATEMENT

K.A.R. 115-16-5. Wildlife control permit; operational requirements.

DESCRIPTION: This permanent regulation establishes requirements for wildlife control permits, and what actions are authorized through a wildlife control permit. These permits authorize the persons or businesses to take nuisance animals outside normal harvest seasons. The proposed amendment would allow the permit holder to have an assistant present to conduct operations, so long as the assistant is directly supervised and in the presence of the permit holder.

FEDERAL MANDATE: None, except that federal law does not allow state authorization to take certain animals without additional federal permits.

ECONOMIC IMPACT: No economic impact to the department, other agencies, or the general public is anticipated.

ALTERNATIVES CONSIDERED: none
