PERMISSION TO QUOTE

This is an annual report that may contain information that is subject to future modification or revision. Persons wishing to quote from this report, for reproduction or reference, should first obtain permission from the Director of the Wildlife Division, Kansas Department of Wildlife Parks and Tourism, 512 SE 25th Avenue, Pratt, KS 67124.

EQUAL OPPORTUNITY STATEMENT

This program receives Federal financial assistance from the U.S. Fish and Wildlife Service. Under Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, the Age Discrimination Act of 1975, and Title IX of the Education Amendments of 1972, the U.S. Department of the Interior and its bureaus prohibit discrimination on the basis of race, color, national origin, age, disability or sex (in educational programs). If you believe that you have been discriminated against in any program, activity or facility, or if you desire further information, please write to:

Deer Harvest Survey 2017 – 2018

Monitoring harvest is an integral part of deer management for the Kansas Department of Wildlife, Parks, and Tourism (KDWPT). Harvest data in conjunction with population monitoring directs more effective harvest goals and regulations. Additionally, hunter activity information increases the ability of deer managers to refine opportunities and adjust harvest goals as part of maintaining sustainable deer populations. KDWPT utilizes a post-season harvest survey to gather this data. This survey is administered once deer permit sales are summarized, so that a sample that is proportional to each permit type maybe randomly drawn. The survey period is approximately 21 days long. Participants selected for participation by email receive an initial email, and two follow up emails at one-week intervals if they have not completed the survey. Participants selected for participation by postcard receive one postcard at the beginning of the open survey period. Data summary and analysis was completed using the statistical program R.

The following summary includes information and is organized in the following order: permit sales, deer harvest by species, age, and sex, harvest by weapon type, hunter use and deer kill on private, public and WIHA properties, season participation, hunter days afield, date of harvest, hunter satisfaction, and a summary of the special section questions. Additionally, an appendix (Appendix 1) includes estimated deer harvest by species, age, and sex for each of the 19 Deer Management Units in Kansas. An additional separate document ([2017-18 Deer Harvest Survey Supplementary Material – Hunter Comments](#)) contains all comments received through the survey as they were written, except that personal identifying information (e.g. names, phone numbers, etc.) are redacted.

This is a summary of the survey data compiled from responses of hunters completing the post-season survey. The accuracy of this summary relies on the accuracy of information provided by participants. When possible, survey responses with information that was not valid were corrected (e.g. a hunter marks one deer harvested, but classifies two and the information in each classification is the same, one classification would be dropped) or removed from the dataset.

Permit Sales and Survey Sample Summary

The total deer permits sold in Kansas for the 2017-18 deer season was 182,632 (Fig. 1), which is a decline of 2.01% from 2016-17 and a 15.78% decline from the peak deer permits sold in 2014. This is the third year in a row that deer permit sales have declined. Most of the declines are in resident over-the-counter permits. The largest declines were in Whitetail Any Season General Resident, Whitetail Any Season Landowner/Tenant, and Resident Whitetail Antlerless Only. Non-resident permit sales have been steady since most non-resident permits are limited availability with quotas, but slight variation occurs with Hunt-Own-Land permits.

Deer Permits Sold by Residency 2017-2018

Figure 1. Deer permit sales 2010 to present. Resident sales (orange) have declined the last three years. Non-resident sales have remained steady since most non-resident permits are limited availability through the random draw, variation in non-resident permits is typically due to changes in the number of hunt-own-land or white-tail antlerless only permits sold.

Deer hunters in Kansas are limited to one permit allowing the take of an antlered deer (the buck permit; all permits allowing an antlered deer to be taken are either sex permits) and must purchase this permit before they may purchase antlerless-only permits unless they purchase antlerless only permits after December 30. During the 2017-18 deer season, hunters purchased 111,151 buck permits. A total sample size of 40,000 was drawn from hunters purchasing buck permits to receive the Kansas Deer Harvest Survey. The 40,000 hunters are sampled in proportion to the number of each type of permit sold. Thirty-two thousand hunters receive an email invitation with a weblink to participate in the survey. Eight thousand hunters are mailed a postcard with a weblink they may use to participate in the survey. Additionally, 3500 bowhunters receive a paper form of the Deer Harvest Survey as part of participating in the Bowhunter Observation Diary, which they mail mail-in or follow the included weblink. All surveys include a hunter’s KDWP number to prevent duplicate surveys from being included as part of the results. The actual number of email invitations sent in the 2017-18 post-season was 28,948, due to incorrect emails, closed emails, etc. Postcards were sent to 7,643 hunters that had valid mailing addresses. A total of 13,982 responses were received resulting in a 34.9% response

rate, made up of 12,107 responses to email invitations, 1076 responses to postcards, and 799 responses from the Bowhunter form. These responses resulted in a total of 13,641 responses with usable data for analysis and estimation of deer harvest and hunter activity for the 2017-18 deer seasons. The low number of responses from resident youth hunters using a muzzleloader permit necessitated combination with the general resident permit type.

Statewide Deer Harvest

The 2017-18 statewide deer harvest of 79,567 was down for the third consecutive year and was 8,164 below the five-year average of 87,731 (Fig. 2). Deer harvest in 2017-18 was the lowest since 2007 and was similar to harvest during 2002 – 2008 period. The 2017-18 deer harvest was the 15th highest harvest in Kansas since modern deer hunting seasons began in 1965, the highest was the 2000 season, when 111,159 deer were harvested.

Figure 2. Kansas statewide deer harvest 1965 to present. Greatest harvest occurred in 2000 (111,159) lowest harvest occurred in 1965 (1,504). The first modern deer hunting season in Kansas was held in 1965.

Residents hunters hunted at a slightly higher rate than non-resident hunters, although 95.0% of all hunters who purchased a deer permit spent time afield. Residents and non-residents had similar rates of successfully harvesting a deer. KDWPT again, for the second consecutive season, did not offer Either Species Antlerless Only permits to limit female mule deer harvest. The total mule deer harvest (1,893) was the lowest in Kansas since 1985 (1,831) and the number of antlerless mule deer harvested (139) was the lowest since 1983 (84) (Table 1). Mule deer harvest made up 2.4% of the total deer harvest. The total antlerless deer harvest made up 46.6% of the total deer harvest, which is lower than the 2016-17 season (48.7%). Deer harvest estimates by species, sex, and age for each Deer Management Unit are included in Appendix 1.

Table 1. Kansas state-wide deer harvest by species, sex, and age in 2017-2018. Non-resident permit classes are gray shaded.

^aLow response rate of resident youth hunting with a muzzleloader permit were combined with general residents hunting with a muzzleloader permit.

Statewide Harvest by Weapon Category

A greater proportion of deer were harvested by centerfire firearms (Table 2) than any other, but compound bows were the next most popular. Pistols were the least used method (0.26%) of harvest although traditional muzzleloader were also little used (0.32%). As a group, muzzleloader hunters killed only 2.77% of the overall deer harvest. Archery methods were used to harvest 37.1% of the deer taken in 2017-18. Crossbow as a legal weapon for use during the archery season continues to be a contentious issue for some hunters. The proportion of the archery harvest by crossbows increased by 15% from 2016 to 2017 and accounts for 27.6% of deer harvested by archery methods (Fig.3).

Figure 3. Proportion of harvest by weapon category and proportion of harvest by sub-category within weapon category. The proportion of deer harvest by archery methods has increased while the proportion of harvest by firearms methods has decreased. The proportion of deer harvest by weapon sub-category has remained steady within the weapon categories, with the exception of crossbow and compound bow sub-categories in the archery harvest category.

Table 2. Kansas state-wide deer harvest by weapon type in 2017-2018. Non-resident permit classes are gray shaded. Unfilled permits may be used as a firearm whitetail antlerless permit during January antlerless seasons, thus there may be deer legally harvested with firearms on an archery permit.

Hunter Use and Deer Harvest on Public, Private, and WIHA Properties

Kansas has multiple types of land available for hunters to utilize. The majority of land in Kansas is under private ownership. A portion of privately owned land is open to public hunting through the Walk-In Hunting Access Program(WIHA). During the 2017-18 deer season 1,040,000 acres was available for public hunting. There were also approximately 390,000 acres of state and federal land, much of which is specifically managed to maximize wildlife resources. The value of these publicly accessible properties to deer hunters in Kansas can be seen by the proportion of the total deer harvest that comes from those properties. Public land makes up 0.74% of land in Kansas, yet 5.79% of the total estimated deer harvest occurs on those properties (Table 3). The proportion of deer harvest on WIHA properties is 3.71%, but WIHA properties account for 1.98% of Kansas. Private property not in WIHA accounts for the remaining 97.28% of land and 90.50% of deer harvest, respectively.

Table 3. Hunter Use and Deer Harvest on Public, Private, and Walk-In Hunting Access Property. Non-resident permit types are grey shaded. The sum of the number of hunters using property types exceeds the total number of hunters as a hunter may use more than one property type. All hunter activity and harvest is accounted for on a hunter's buck permit, thus no whitetail antlerless only permit categories are included.

Hunter Participation by Season

During the 2017-18 deer seasons, only the muzzleloader and archery seasons had a greater than expected proportion of participation by non-residents. Of the three major seasons (muzzleloader, archery, firearms), firearms season has the greatest proportion of participation by Kansas residents at 87.0%. Seasons that limited harvest to antlerless deer, are proportionally more heavily participated in by residents. While most antlerless seasons are specific to deer management units and occur after seasons allowing antlered deer harvest; the proportion of participation in the Pre-rut season, which is available statewide, was 98.0% Kansas resident and only 2.0% non-resident. The same applies to seasons that limit participation to a specific segment of the hunter population like the designated persons season (Youth/Disabled Season) at 92.2% resident participation. A slightly greater than expected proportion of residents indicated that they did not participate in any season and didn't hunt at all.

Table 4. Number of hunters participating in a season. Non-resident permit classes are grey shaded. Totals may exceed permits issued as hunters may participate in multiple seasons with the appropriate permit(s). All seasonal participation is included in a hunter's buck permit classification.

Hunter Days Afield

During the 2017-18 deer seasons hunters in Kansas spent over 1.2 million days hunting deer (Table 5). Not including antlerless permits, residents averaged 12.0 days hunted per permit purchased, while non-residents averaged 7.5 days hunted per permit purchased. Resident landowner/tenants who held a statewide archery permit hunted the most days per permit at an average 17.3 days, with general residents holding a statewide archery permit hunted second most averaging 16.5 days per permit. Resident landowner/tenants hunted the fewest average days per permit at 3.8 days. Among non-residents the most days hunted were by hunters using a Hunt-Own-Land permit at an average of 9.7 days per permit, while non-residents with a muzzleloader either species either sex permit hunted on average of only 4.0 days per permit.

Table 5. Hunter Days Afield by Season. Non-resident permit classes are gray shaded. All hunter activity in days afield are included on a hunter's buck permit classification, including whitetail antlerless only permits, thus a hunter with a muzzleloader permit may hunt during archery season, with archery equipment for antlerless whitetail deer if they held an antlerless whitetail deer permit.

Date of Harvest

Deer Harvested by Date

Figure 4. Deer Harvest by Date. Harvest is split by permit type used as either the Either Sex permit (Buck permit) and Whitetail antlerless only permit. Dates (in Year/Month/Day format) labeled on the x-axis are Saturdays during the 2017-18 season. More deer (25.1%) are harvested on Saturdays than any other day of the week, while Mondays have the least amount of harvest (6.9%).

Hunter Satisfaction

Satisfaction of Kansas deer hunters was largely tied to whether or not they harvested a deer (Table 6). A greater number of hunters that harvested a deer also completed the satisfaction portion of the survey. In general, hunters harvesting a deer displayed greater satisfaction rates than those that did not. Non-residents were also likely to display greater satisfaction than residents.

Table 6. Hunter Satisfaction by Residency for 2017-18 Deer Season. Harvesting a deer is closely tied to hunter satisfaction.

Residency	Did they harvest a deer this season?	Hunters Completing Satisfaction Question	Percent (%) Extremely Dissatisfied	Percent (%) Dissatisfied	Percent (%) Mildly Dissatisfied	Percent (%) Neutral	Percent (%) Mildly Satisfied	Percent (%) Satisfied	Percent (%) Extremely Satisfied	Percent (%) Dissatisfied Total	Percent (%) Satisfied Total

Special Section

Antlerless Deer Permit Purchasing Decline

The 2017-18 Kansas deer harvest survey asked hunters if they had purchased fewer antlerless only permits for the 2017-18 season than they had in the past 3-5 years and if they had not purchased as many, to score possible reasons as to why they had not purchased more. Few non-residents purchased fewer antlerless permits while about one third of residents had purchased fewer (Table 7). Residents and non-residents indicated that not having time available to hunt, the cost of antlerless permits and the overall cost of hunting were concerns that limits their purchase of antlerless permits (Fig. 5). The perception of too few deer in their hunting area was also of concern to residents and was the only reason on which resident hunters selected “Extremely Important” more than any other importance category except “Not Important”. Hunters were also given the ability to provide additional reasons for purchasing fewer antlerless permits. Common additional reasons were: hunting in a deer management unit with restricted antlerless permit use, and that additional antlerless permits are only purchased after filling their buck permit or previously purchased antlerless permits, weather, short antlerless season length.

Table 7. Special Section Respondents. More residents purchased fewer antlerless than non-residents. Most non-resident antlerless permits are required purchases as part of the non-resident combination permit and few additional antlerless permits are purchased by non-residents. Resident antlerless permits are at-will purchases.

Residency	Total Respondents	Purchased Fewer Permits	Purchased Fewer Permits %
Resident	9495	3214	33.8%
Non-resident	3086	381	12.3%

Figure 5. Importance of factors that influenced hunters to limit purchase of antlerless permits by residency. A broad array of factors affects antlerless permit purchases. Not having time to hunt was one of the most commonly listed reason for purchasing fewer antlerless for both residents and non-residents.

Deer Hunter Travel

The distance a hunter must travel to a property on which they have access to hunt can impact the effort they expend to hunt and the number of days they are able to hunt. Hunters in Kansas largely do not live on their primary deer hunting property (Fig. 6). Most hunters (69.15%) live 100 or less miles from where they primarily hunt deer and the majority of these are residents (Fig. 6). 16.26% of hunters live within 101 to 500 miles (Fig. 7) and 14.45% live 501-2000 miles (Fig. 8) and only 0.14% live over 2000 miles; the last two groups are almost entirely non-residents.

The following plots show what percentage of Kansas deer hunters travel a particular distance to their primary deer hunting property in Kansas, which they may or may not own. Due to respondents estimating distances when actual mileage is unknown, which increases as distance increases, answers are binned. Since the number of hunters in each bin declines as distance traveled increases, for each graph, bin width (number of miles included, e.g. 1-25, 101-200, etc.) was adjusted as was the y-axis scale to better display data.

Proportion of KS Deer Hunters Traveling 0-100 Miles to Primary Deer Hunting Property

Figure 6. Proportion of deer hunters travelling 100 or fewer miles to their Kansas hunting location.

Proportion of KS Deer Hunters Traveling 100-500 Miles to Primary Deer Hunting Property

Figure 7. Proportion of deer hunters travelling 100-500 miles to their Kansas deer hunting location.

Proportion of KS Deer Hunters Traveling 500-2000 Miles to Primary Deer Hunting Property

Figure 8. Proportion of deer hunters travelling 500-2000 miles to their Kansas deer hunting location.

Appendix 1. KS Deer Harvest by Species, Sex, and Age for Each Deer Management Unit

The total estimated deer harvested across all deer management units may not match the statewide estimated total harvest due to rounding. Due to the low number of survey responses received from hunters holding a youth muzzleloader permit, data from that permit category was included in the muzzleloader general resident category.
